

## PROTUNE

Protune is Lochard Inc's planned maintenance program.

Just like your car, your heating and air conditioning system also requires an annual tune-up. By having your equipment cleaned and calibrated on a regular basis, you can maximize your energy usage, keep your fuel bills to a minimum, and prolong the life of your equipment. When you enroll in our low-cost Protune plan, we will service your equipment, and you will also get free diagnostics if problems should arise throughout the year. The cost of one emergency service can exceed the cost of an annual maintenance agreement. Our agreement guarantees that for a yearly fee, our certified technicians will visit your home twice a year to inspect and test your heating and air conditioning equipment.

## Benefits of being a PROTUNE member:

- 1 Automatic reminders for 2 visits per year & automatic renewal**  
One visit for your heating system and accessories and another for your cooling system.
- 2 Priority scheduling status**  
A Lochard technician would be dispatched to your home before **non PROTUNE** customers.
- 3 Free diagnostic inspections**  
As a member, our \$69 diagnostic fee is waived (\$149 after hours).
- 4 No overtime charges**  
In the event you need emergency help; no heat on a freezing cold night, no cool on a hot and humid weekend, safety or health issues arise, you would not be charged after hour rates on repairs.
- 5 Our technicians use a comprehensive task list that exceeds guidelines set fourth by an American National Standards Institute (ANSI).**

**We want to give you the peace of mind that your family's home is safe, comfortable & efficient.**
